New TrojPix Attack Leaks Data From Air-Gapped Systems via Video Cable Emissions

RESEARCHERS AT SHANDONG

UNIVERSITY have shown a fast new way to pull data off computers that are cut off from every network. The technique, called TrojPix, tweaks

on-screen pixels in ways the eye cannot see, so that the video cable carrying them radiates a faint radio signal a nearby receiver can decode. But TrojPix...

Some of the nation's rich are letting AI teach their kids

Most Americans don't trust AI. It's proven that it doesn't know what safe toppings for pizza are. People don't even want to listen to AI music. But none of that matters for some of America's wealthy, who are turning to AI to teach their kids instead of traditional schools. Companies like Forge Prep and Alpha [...]

Opera GX Flaw Let Malicious Sites Auto-Install Mods to Steal Data From Visited Pages

Researchers found a flaw in Opera GX, the gaming-focused version of the Opera browser, that let a malicious website silently install a browser add-on and use it to lift specific data from the pages a victim visits. In a proof of concept, they reconstructed a signed-in user's full Gmail address from a single visit...
