Key Nvidia and Intel supplier raided over alleged China origin fraud — Unimicron faces probe over PCB origin washing, risk of 40% U.S. tariff penalty

TAIWANESE PROSECUTORS ARE INVESTIGATING Unimicron, one of the world's largest PCB and chip substrate makers and a key supplier to

Nvidia, Intel, Google, and Amazon, over allegations that it shipped China-made PCBs back to Taiwan and relabeled them as Taiwanese products.

Foundry Model Router Expands from Two Regions to 28, Refreshing Its Model Pool

Microsoft expanded Foundry's model router from two regions to 28 for global standard and 21 for data zone deployments, while adding Claude Opus 4.8 and GPT-5.6 and removing four deprecated models. Default deployments receive pool changes automatically; configured subsets exclude new models until added. The effective...

Diehard Asus customer gets RMA denied for a cheap 2.4 GHz headset receiver despite spending more than \$30,000 with the brand — firm refuses to send a cheap dongle, then relents after social media backlash

Asus refused to replace a loyal customer's wireless headset receiver because accessories are apparently not covered under warranty. The customer was not happy to see his dedication be put into question like this, brining receipts of past purchases to express their disappointment over this betrayal.

Article: Eliminating Long-Lived Credentials in GCP with Workload Identity Federation

Long-lived GCP service account keys are secrets that must be managed forever, are hard to rotate, and are easy to leak. Scaling Workload Identity Federation to 120+ production projects shows why it changes how machine identity is approached entirely: keys are secrets to manage, federated identities are trust...
