U.S. Government Entity Paid Kairos \$1 Million in Data-Theft Extortion Case

A U.S. government entity paid about \$1 million to keep stolen files from being leaked, according to a new case study by Rakesh Krishnan for Ransom-ISAC, built on a leaked negotiation chat and the blockchain trail the payment left. The odd part: the group that took the money calls itself Kairos, but it may not be a...

Chinese YMTC SSDs make their way into retail Lenovo laptops — media outlet slams YMTC PCIe 4.0 drive for 'below average for an SSD in an office laptop' in review

Lenovo has seemingly begun using YMTC SSDs in some of its laptop models, allowing the Chinese storage chip company to gain a foothold in the U.S. This is despite its inclusion on the U.S. Department of Commerce's Entity List and its branding by the Pentagon as a Chinese military company.
