Ponytail Agent Skill Corrects Its Own Benchmark After Contributor Challenge

A SINGLE-AUTHOR REPO OF instruction files, not code, Ponytail passed 44,000 GitHub stars in nine days by making coding agents stop over-building. Its headline claim of

80-94% less code came from a flawed baseline; after a contributor said so, the maintainer rebuilt the benchmark as a real agentic run and published a...

Texas slams on the brakes for 1,800 data centers, power grid requirements are five times higher than peak record demand — 474 gigawatts of power requests are now subject to new moratorium

Gov. Greg Abbott (R) instructed PUCT and ERCOT to pause all data center applications until they complete an audit on all the information that data center developers must submit. The move reportedly came after PUCT asked 377 data center operators to submit water and power use, of which only 28 complied.
