Four nuclear reactors hit a big milestone in the US

I was really looking forward to July 4, and not just because I love a poolside barbecue. This year the American holiday also marked a big symbolic deadline for US nuclear power. Last year the Trump administration set a goal to see three new microreactors achieve criticality, a technical milestone establishing that a...

Top AI Agents Built to Catch Malicious Code Can Be Tricked Into Running It

Ask an AI coding agent to scan open-source code for security holes, and it might run the attacker's code on your own machine instead. That is the finding in a proof-of-concept published Wednesday by the AI Now Institute, an attack it calls "Friendly Fire." It works against Anthropic's Claude Code and OpenAI's Codex...

Power company hikes data center bills by 30%, cuts residential electricity costs by 1.3% — Oregon approves change through POWER Act, pushes developments using more than 20 Megawatts of power to pay their fair share

Oregon approves the 29.7% price hike that Portland General Electric (PGE), the state's largest power provider, will impose on users that consume 20MW or more. This move is backed by Oregon's POWER Act, which helps ensure that data centers in PGE's coverage area pay their fair share.
