TSMC CEO C.C. Wei says, 'It will be a long time before we can meet customer demand' — tells shareholders that he will keep prices stable, refrain from implementing price hikes

TSMC SAYS IT DOES not have enough capacity to handle all the demand from AI hyperscalers, with CEO C.C. Wei saying that it will take a long time before

it can match customer demand. This is an opportunity for Intel, though, as companies desperate to get their hands on advanced chips might be willing to use Intel 18A...

Nintendo Switch 2 with user-replaceable batteries coming to the EU — console maker confirms it will comply with regulations set to take effect from 2027

The European Union's new directives for easily user-replaceable batteries will force Nintendo to update its Switch 2 console with a revised model. The law goes into effect from February 18, 2027, which means an updated Switch 2 that complies with these new regulations needs to come out before that deadline.

Elon Musk's SpaceX secures 100% property tax exemption for planned \$55 billion Terafab semiconductor factory in Texas — county approves 35-year deal worth hundreds of millions despite resident backlash

SpaceX has secured a 35-year, 100% property tax abatement for its proposed \$55 billion TeraFAB semiconductor facility in Texas. Elon Musk argues the exemption is essential to compete with global chipmakers, while residents raise concerns over transparency, infrastructure, and environmental impacts.
