After backlash, Meta pauses plan to ‘rate limit’ its smart glasses

REMEMBER WHEN META WAS planning to charge a \$20 monthly subscription fee for the smart glasses feature that lets people hear each other more clearly -

even though that feature runs locally on your glasses and doesn't require the cloud? Meta has paused those plans, spokesperson Tyler Yee confirms to The Verge. The...

OpenAI's own model went rogue before Kimi had Wall Street sweating

Chinese AI lab Moonshot's open model Kimi went viral this week for reasons that had less to do with the model itself and more to do with how the U.S. AI industry reacted to it. Meanwhile, an unreleased OpenAI model wandered outside its test environment and ended up connected to a real security breach at Hugging Face —...

How Zalando Built an In-Process Client-Side Load Balancer for One Million Requests per Second

The engineering team at Zalando recently described the design and implementation of an in-process, client-side load balancer for a high-throughput API handling around 1 million requests per second. The result was more predictable latency, a drop in infrastructure costs, and better visibility into where failures...
