The planetary wave headed for California isn't what you think it is

A RATHER STRONG "PLANETARY wave" recently slammed into South America and is making its way toward California. In case you're worried about headlines warning

of the supposedly "freak" phenomenon "bringing trouble," it's worth understanding what this wave really is and isn't. Called a Kelvin wave, it's carrying warm...

LibreOffice and OpenOffice Flaws Let Malicious Spreadsheets Run Code Without Macro Warnings

A malicious spreadsheet can make LibreOffice and Apache OpenOffice run an attacker's code as soon as the file is opened, security researchers have shown. There is no warning first, of the kind either program shows before it runs a macro. The attack works only when the program's Java support is enabled. So far, it has...
