Is Your Exposure Management Platform Leaving You Exposed? Five Tests to Find Out

A CRITICAL FINDING CAN move through several security tools and still leave the organization exposed. The vulnerability has a severity score, and a ticket has reached the queue. Progress then depends on information the finding may lack: who owns the system, whether attackers can reach it, what protection exists, and...

The Download: Texas’s fragile AI boom and energy policy shifts

This is today’s edition of The Download, our weekday newsletter that provides a daily dose of what’s going on in the world of technology. Texas was the new epicenter of the AI data center buildout. That might be kaput. Texas is the fastest-growing data center market in the US and ground zero for Big Tech’s…

OpenAI AI Pipeline Generates 948 Linux Root Escalation Exploits in 30-Hour Run

OpenAI on Wednesday detailed a pipeline that employed an upcoming cyber-focused artificial intelligence (AI) model to validate and patch 948 local privilege escalation vulnerabilities in Linux for $1.2 million in API costs. "Our prototype identified and analyzed 2,308 candidate Linux kernel findings, dynamically…

Spotify is coming to United Airlines seatbacks — with help from Starlink

United has built a custom, native Spotify app for seatback displays, allowing passengers to log directly in to their personal accounts and stream their own libraries, playlists, and video podcasts while flying 35,000 feet in the air. The new integration is being powered by Starlink's satellite Wi-Fi, which is...
