## Roundcube Pre-Auth SQL Injection Flaw Actively Exploited in the Wild

**THE CANADIAN CENTRE FOR** Cyber Security has warned that a now-patched Roundcube Webmail vulnerability is being actively exploited in the wild. The

vulnerability in question is CVE-2026-48842 (CVSS score: 8.1), a pre-authentication SQL injection in the virtuser\_query plugin of Roundcube Webmail versions 1.6.x before...
