GitHub Adds 3-Day Dependabot Cooldown to Limit Poisoned Package Adoption

GitHub has announced a new cooldown mechanism in Dependabot, allowing the tool to wait at least three days after a release is published before opening a pull request. "The cooldown configuration option in the dependabot.yml still controls the behavior, though, so you can choose a different cooldown parameter that fits...

Minecraft system requirements raised for the first time in 17 years — Microsoft now recommends 16GB of RAM and a 2020s or newer CPU to run the Java Edition

Microsoft is increasing the minimum and recommended system requirements for Minecraft for the first time, 17 years after it launched. Although the system upgrade is quite reasonable and the hardware falls squarely within the most popular components in the most recent Steam Hardware Survey, those playing with a...
