Making the case for context-aware AI

Enterprise AI can generate recommendations, automate tasks, and help organizations make decisions faster. But without an understanding of how a business actually operates, even powerful models can miss the constraints and relationships that determine whether a decision is the right one. As companies look to move AI…

Three things you should know about permafrost

How much do you know about permafrost? Maybe, like me, you've been aware that this layer of frozen soil is thawing, that it's important in the global puzzle of climate change … and that's about the extent of it. The great news for both of us is that my colleague James Temple just published two…

Node.js Brotli Decoder Bug Could Allow Remote Code Execution in All Supported Versions

Node.js released security updates on October 21 for its three supported release lines, 22.x, 24.x and 26.x, fixing 10 flaws. The most serious is a bug in the Brotli decompression code that Node.js bundles, which the project says can allow remote code execution, meaning an attacker could run code of their choosing on…
