Anthropic warns of 'catastrophic' AI risks in its own IPO filing

AS ANTHROPIC GEARS UP for its greatly anticipated public debut, a preview of the company's IPO filing reportedly details its mounting losses, leadership proposals to

retain power, and how its AI development plans could "further increase the risk that our models cause harm." These disclosures come as Anthropic eyes a...

Coming soon: Our 2026 list of Climate Tech Companies to Watch

Earlier this month, the UN announced the planet will tip past 1.5 °C of warming, "likely within the next few years," squashing any lingering hope that nations would cut emissions fast enough to achieve the loftiest goal of the Paris climate agreement. In the US, the world's second-largest-emitting country, its leader...

Making AI an asset, not an expense

When customers talk about AI costs, the conversation usually starts with token prices and ends with access to the latest, most capable model in the cloud. Do they always need that level of capability? Not necessarily. But that is often where the conversation goes. As AI moves from experimentation to production, model...
