Reddit's AI is turning posts into podcasts and short videos

REDDIT IS TRYING OUT a new way for people to take in content on Reddit: by turning text posts into audio / video content. As part of an

experiment, some posts are being adapted into videos that use AI voices to read the text of the main post and some comments. The video highlights the [...]

Critical GitLab GraphQL Flaw Could Let Unauthenticated Attackers Delete Public Projects

GitLab has released security updates to address a critical vulnerability impacting its Community Edition (CE) and Enterprise Edition (EE) software that, under certain conditions, could allow an unauthenticated attacker to remotely modify or delete public projects and user data. The flaw, tracked as CVE-2026-19478, has...
