Carbonato Botnet Compromises Docker Hosts to Deploy Telegram-Controlled Hermes AI Agent

CYBERSECURITY RESEARCHERS HAVE DISCLOSED details of a new botnet malware called Carbonato that's targeting exposed Docker daemons to deploy an

open-source artificial intelligence (AI) agent framework called Hermes Agent. "The implant installs the framework unchanged, then overwrites its SOUL.md persona file,"...

Article: Five Ways To Use AI Coding Agents to Improve Your Software Architecture

Modern architectures often use legacy services for specific tasks, but these services may lack accurate documentation and using them can be risky if you don't understand them well. AI coding agents can help close that knowledge gap. By Pierre Pureur, Kurt Bittner, Todd Miller
