Drones to protect undersea cables from Russian sabotage touted in new defense pact — US one of three partners developing new tech to protect \$1.8 trillion in daily transactions

THE AUSTRALIAN, UK, AND U.S. governments just announced a cooperation to develop new technologies to protect underwater cables. The move comes after recent

incidents of damages to undersea cables across the world, as well as the Russian Navy's surveying of areas near where undersea cables run.

Chinese military has been acquiring Nvidia chips, even post-Washington export controls, research claims — multiple institutions linked to the PLA asked for Nvidia AI chips, according to publicly available documents

A business-intelligence researcher said that the Chinese military has been actively acquiring Nvidia AI chips, even after the U.S. put export controls on them. Public documents show that some institutions ask for these chips either through the specifications they demand or by directly asking for Nvidia chips by name.
