OpenAI's Next AI Model Astra Shows Cyber Performance Strong Enough to Trigger Pause

OpenAI has announced that it's pausing some "internal activities" involving its upcoming artificial intelligence (AI) model Astra after an internal evaluation found it had made significant advancements in agentic coding and cybersecurity. In response to the discovery, the AI upstart said it's implementing security...

Buildpacks Move the Container Hardening Control Point Away From the Dockerfile

Cloud Native Buildpacks, which graduated within the CNCF in July 2026, move base image choice out of per-service Dockerfiles into a single builder owned by platform engineering, enabling fleet-wide patching. BellSoft's hardened Paketo builder is the latest sign that vendors now treat the builder, not the Dockerfile...

Beyond Consensus: The Fragmentation of AI Policy Across the Linux Ecosystem

The AI policies across the Linux ecosystem are very heterogeneous, ranging from the GCC's restrictiveness, the Linux kernel's pragmatism, to the more open disclosure-based utility model of Kubernetes' landscape. From core infrastructure to high-level orchestration, these distinct approaches highlight a shared...

Experts find AI agents can be tricked into 'remembering' fake facts for months — so how do we stop it?

Hidden text on a webpage can become a fact your AI assistant "remembers" and acts on weeks later.
