I tried replacing 30 minutes of scrolling with ChatGPT-generated real-world challenges — and it changed my evenings

I asked ChatGPT to replace 30 minutes of evening scrolling with offline challenges, and the results were surprisingly reflective, engaging, and much harder to ignore than another trip through social media.

Teen's Bluetooth speaker named 'BOMB' caused a 10-hour delay on flight from Newark to Spain — passenger reported concerns to flight attendant at 32,000 feet, forcing plane back to the US

Passengers on United Airlines flight UA236 on Saturday were subjected to deplaning, TSA rescreening, and over 10 hours of delays thanks to a teen foolishly naming their Bluetooth speaker 'BOMB.'

Chinese military has been acquiring Nvidia chips, even post-Washington export controls, research claims — multiple institutions linked to the PLA asked for Nvidia AI chips, according to publicly available documents

A business-intelligence researcher said that the Chinese military has been actively acquiring Nvidia AI chips, even after the U.S. put export controls on them. Public documents show that some institutions ask for these chips either through the specifications they demand or by directly asking for Nvidia chips by name.
