Poor liquid metal application almost destroys Asus Zephyrus M16 laptop, eats through the processor lid — paste replacement triples framerates, drops temps, and eliminates hard crashes

A USER ON REDDIT shared their story about how the factory-applied liquid metal on their Asus Zephyrus M16 gaming laptop corroded the heatsink and lid of their

CPU. It got so bad that the corrosion was about to eat away and seep onto the silicon itself, but thankfully a simple re-paste job averted catastrophe.

Modders solder power cables directly to RTX 5090 PCB to eliminate notorious melting 16-pin connector — bare-board Galax HOF card pulls 600W under chiller cooling

TecLab, a Brazilian YouTuber, has just shown the most dangerous method of bypassing the 16-pin connector on an RTX 5090 — by soldering wires directly to the card's PCB. In an attempt to save the GPU from melting, they've created perhaps an even bigger fire hazard.

US military uses high-energy lasers to shoot down three Mexican cartel drones over the southern border — narcos suspected of using UAVs for surveillance and reconnaissance to support illegal activities

The US military has successfully deployed a laser defense system on the southern border of the country and shot down alleged Mexican cartel drones. These UAVs are suspected of spotting U.S. law enforcement operations and help the criminal organizations traffic humans and goods into the United States.
