Meet the innovators under 35 shaping climate tech

EACH YEAR, THE EDITORIAL team at MIT Technology Review puts together a list of 35 innovators under 35—a group of researchers, inventors, and other young minds worth

following. The team worked on the newest edition of the list for months, and the final slate includes nine individuals from all over the world in the...

Repeated VM Escapes By GPT-5.6-Cyber Based Agents Prove VMs and OS' Require Better Maintenance

Traditional virtual machines are inadequate for isolating cyber-capable autonomous agents. Tests using GPT-5.6-Cyber indicated multiple escape attempts due to kernel flaws. While Firecracker provided some containment, vulnerabilities remained. The study underscores the need for minimal attack surface virtualisation...
