Jensen Huang says Nvidia achieved AGI, again — not that it matters

ON NVIDIA'S EARNINGS CALL Wednesday, CEO Jensen Huang casually announced the company had "achieved AGI," one of the tech industry's ultimate goals some of

its biggest players have spent years chasing. Almost immediately, Huang dismissed the coveted milestone as "senseless." He's right. For the supposed finish line of...

Many talks between data center developers and local governments are wrapped in secrecy behind non-disclosure agreements — residents question the need for NDAs, but developers argue it's important to avoid 'running afoul of insider trading rules'

Researchers discovered that most negotiations between data centers and local governments are protected by NDAs. These documents keep details in secret, with residents having a difficult time finding information about these projects because of the agreements.
