Attackers Exploit UnrealIRCd Flaw That Enables Server-Level Command Injection

THE U.S. CYBERSECURITY AND Infrastructure Security Agency (CISA) on Friday added a high-severity security flaw impacting UnrealIRCd, an open-source Internet Relay Chat (IRC) server, to its Known Exploited Vulnerabilities (KEV) catalog, following reports of active exploitation. The vulnerability, tracked as...

Node.js Brings Debounce, Throttle, and PKCS#12 Parsing Into Core Modules

Node.js 26.10.0 adds util.debounce() and util.throttle(), plus util.markPromiseAsHandled(), to the core library. It also introduces crypto.parsePKCS12() for reading .p12 and .pfx bundles, and extends the experimental Virtual File System to node:ffi. The additions reduce the need for some userland dependencies. Node.js...

FAA lifts nationwide ground stop that blocked takeoffs for hours

Takeoffs from airports throughout the US largely stopped on Friday after the FAA issued a national ground stop at 3:44PM ET "due to extraordinary circumstances and for reasons of safety." More than four hours after the stop was issued, officials announced it was lifted at 8:15PM ET and that flights will resume. It's...
