The Third-Party Agent Problem: Why Security Built for AI You Chose Misses the Agents You Didn't

IN ENVIRONMENTS STUDIED FOR the 2026 State of Agent Security Report, roughly 1,280 third-party products now embed AI. About 282 of them sit behind single

sign-on. The other thousand are invisible to identity infrastructure by default, not because anyone hid them, but because an identity stack can only govern what...

Decade-old RAM is making a comeback

CPU makers have noticed that the seemingly unending RAM price hikes are making it tough for a lot of us to upgrade our PCs. Their solution? A return to last-gen DDR4 RAM. Intel and AMD are making new CPUs that'll support the older, more affordable type of memory. On Friday, Gigabyte announced that two of [...]
