LEAD STORY · HARDWARE & CHIPS

Chinese survey ship loitering near undersea cable ignores Philippine demands to withdraw — evasive action point to growing PRC threats to data lines in the Pacific

A Chinese research vessel ignored the Philippine coast guard's attempts to move it as it loitered over an undersea cable near its coast as the PRC continues to use civilian vessels as "gray-zone" warfare against potential future adversaries in the region.

AI chip smugglers exploit trade control loophole to bring banned HBM from South Korea into China — expensive memory chips packaged with cheap, unsanctioned processors to become legal exports

Customs authorities only check the performance specifications of a server's processors, allowing smugglers to attach high-end memory chips to low-end processors and ship them into China.

The 4 Elements of Exposure Prioritization and How to Operationalize Them

Your team is remediating more vulnerabilities than ever, yet your breach risk has barely changed. You're spending too much time and effort on exposures attackers may never exploit, while higher-risk exposures sit, waiting in the queue. Gartner®'s report on exposure prioritization states that fewer than 10% of...
