Belgian-Chinese semiconductor researcher arrested over alleged GaN trade-secret theft — prosecutors suspect BelGaN insiders transferred chip IP to China before the company collapsed

BELGIAN AUTHORITIES HAVE ARRESTED

a former BelGaN researcher on suspicion of industrial espionage, alleging that proprietary

gallium nitride semiconductor technology was transferred to a Chinese rival as the Belgian chipmaker headed toward bankruptcy.

Does ICANN Open the Door on Identity Theft by Dropping 3rd Level .name Domains Registrations?

Neil Fraser's disclosure highlights a regulatory change affecting the .name top-level domain. Following ICANN's approval, Verisign will eliminate third-level registrations due to declining usage. This affects about 22,000 registrants and raises security concerns, as released second-level domains could be exploited...
