Coldcard Hardware Wallet Flaw Linked to \$70 Million Bitcoin Theft in 41 Minutes

An attacker drained 1,196 Bitcoin addresses in 41 minutes on July 30, taking 1,082.65 BTC worth about \$70.2 million at the time. Galaxy Research mapped the sweep and tied it to a firmware flaw in Coldcard, the Bitcoin-only hardware wallet made by Canadian firm Coinkite. A March 2021 firmware integration error routed...

Dell founder shows how a \$100 billion empire started 42 years ago — CEO says 'This one page changed my life'

Billionaire Michael Dell reminisced about the early days of his company, sharing an early quarterly earnings report that showed the then-startup making nearly \$135,000 in just three months. Dell says that that document changed his life, as it convinced his parents that he no longer needed to go back to college and...

Microsoft vows to make Windows 11 fly on 8GB RAM amid memory shortage — optimizations to reduce OS memory footprint have begun

While the company's minimum OS specifications officially say 4GB, most PC builders know that 16GB is the bare minimum for a smooth experience on Windows 11. However, the memory chip shortage and the resurgence of 8GB laptops are likely forcing Microsoft to optimize Windows.
