Amazon promises to spend \$1 billion on communities close to its data centers, but critics push back

AWS CEO MATT GARMAN said in a company blog post that it will allocate \$1 billion over five years to key issues that data center

communities raised, including education, workforce pathways, energy affordability, and more. This amounts to grants of \$200 million annually, even as the company allocates \$220 billion on...

AI Agents Are Disrupting Open Source Security Disclosure

A recent article by Anil Madhavapeddy argues that AI agents can turn publicly available clues about software vulnerabilities into working exploits, reducing the effectiveness of traditional disclosure embargoes in open source projects. The author highlights the need for faster patching and release processes as the...
