Meta will use your activity on other websites to personalize your feeds

Meta is planning to use the data shared by other businesses to personalize your feed and its AI responses. In a blog post on Tuesday, Meta explains that it already uses your off-platform activity, like the games you play or your purchases on other websites, to serve you ads. But now it's expanding the scope [...]

Microsoft AI chief walks back comments about AI taking over white-collar work

Microsoft AI head Mustafa Suleyman is walking back his statement about AI automating jobs done by white-collar workers, including lawyers, accountants, and project managers. During an episode of Decoder on Monday, Suleyman says he meant AI will help these workers complete tasks, rather than do their jobs: Sending an...

HVAC tech finds former AMD CEO Rory Read's PC in a customer's basement, signed by Lisa Su — unused 2014 desktop had Bulldozer-era hardware inside and a wrapped Windows 8.1 CD

Someone on Reddit has stumbled upon former AMD CEO Rory Read's PC that might've been given to him as a parting gift. Read was AMD's CEO between 2011 and 2014. He helped AMD navigate the failure of Bulldozer while securing massive console contracts with Sony and Microsoft, and also began work on the Zen architecture...
