Extradited Russian Hacker Faces Charges Over Excel Malware Campaign That Infected Thousands

THE U.S. DEPARTMENT OF Justice (DoJ) has charged a Russian national, extradited from Cyprus on August 28, with using roughly 255 fake accounts on a

freelance platform to send malware-laced Excel attachments to about 80,000 of its users in 2016 and 2017. Searzhudin Tamirlanovich Aktulaev, 40, was arrested in Cyprus in...

GeoNetwork Fixes Unauthenticated RCE Chain Affecting Government Geoportal Backends

Two vulnerabilities in GeoNetwork can be chained to achieve unauthenticated remote code execution (RCE) on the open-source geospatial metadata catalog, which sits behind many government and agency geoportals. The project shipped fixes in versions 4.4.12 and 4.2.17 on July 8, 2026, and published the vulnerability...
