What must happen for AI's trillion-dollar gamble to pay off

WHEN JESSICA WACHTER, a finance professor at the University of Pennsylvania's Wharton School, wanted to assess AI's impact on the economy over the next few years, she

faced a long list of business and technical uncertainties. So she started with what she calls a "remarkable fact" that is not in question: A handful of...

Grab's Agent Framework LLM-Kit Accelerates AI Agent Production Deployment

Grab has implemented LLM-Kit, a framework that standardizes over 500 internal agent services. This system enhances service integration, evaluation, and secret handling, reducing the time to deploy new AI agents from two weeks to one hour. It centralizes infrastructure management, allowing runtime tool discovery and...
