Meta Open-Sources Muse Glimmer: A 30B Local Agentic Model Optimised for On-Device Execution

META AI RESEARCH HAS introduced Muse Glimmer, a 30-billion-parameter open-weight model under the Apache 2.0 license, designed for local workflows. It enables

autonomous agents and complex task execution on consumer GPUs without relying on cloud APIs. The model employs a multi-stage training approach for efficient...

PS5 emulation arrives on Steam Deck, Astro Playroom showcased running at 0.6 FPS — milestone SharpEmu development shows promise, despite unplayable performance

Astro's Playroom runs at 0.5 to 1 FPS on the Steam Deck when emulated through SharpEmu. It's not much — it's nothing at all, in fact — but just the proof-of-concept alone is enough to stir up excitement for both Steam Deck and PS5 emulation scenes.

Apple and Epic argue over how much Apple should get from purchases made outside the App Store

In a new filing in its long-running legal dispute with Epic Games, Apple has proposed a structure that would allow it to collect fees on digital purchases made via external links that don't use the company's in-app purchase system. Epic has already responded, saying that Apple's request is "far outside of the bounds"...
