Microsoft Entra ID Flaw (CVSS 10.0) Exploited in Wild, Allows Remote Code Execution

MICROSOFT ON THURSDAY WARNED of a maximum-severity security flaw in Entra ID that it said has been exploited in the wild, but noted that no

customer action is required. The vulnerability, tracked as CVE-2026-69836 (CVSS score: 10.0), is a case of remote code execution impacting the tech giant's cloud-based identity...

Framework says it's addressing a BIOS update that bricked some of its older laptops

Some Framework Laptop 13 owners with last-gen AMD chips have reported that a recent BIOS update is bricking their laptops on both Windows and Linux. The BIOS update causing this issue is version 3.20 for Ryzen 7040-series mainboards, released back in July and still available on Framework's site at the time of this...
